EduGenie– Google Gemini Powered Learning Assistant

An AI-powered learning companion for personalized, interactive and accessible education

Project Overview

• EduGenieuses Gemini models to help students understand concepts, practice questions and organize learning.

•It can support text-based and multimodal learning experiences.

MainGoal

•Provide personalized learning support through explanations, quizzes, summaries and study assistance.

ProblemStatement

Students often need learning support beyond the classroom

Challenges

- Different students learn at different speeds and may need different explanations.
- Finding clear explanations, practice questions and revision material can take time.
- Students may hesitatetoaskrepeated questions or need help outside class hours.

Need

- A convenient AI assistant that can explain topics clearly and adapt learning support to the user's needs.

ProposedSolution

EduGenie connects student questions with Gemini-powered learning assistance

Ask & Learn

•Students can ask questions in natural language and receive step-by-step explanations.

PersonalizedSupport

•The assistant can adjust explanations based on topic, difficulty and learner preferences.

Practice

•EduGenie can generate quizzes, flashcards, examples and revision questions for practice.

Multimodal Learning

• Gemini can process text and other supported inputs, enabling richer learning workflows cite turn0search4

Key Features

Core features of the EduGenielearning assistant

AI Tutor

•Explains difficult topics in simple language with examples.

QuizGenerator

•Creates topic-based MCQs, short-answer questions and practice tests.

Study Summarizer

•Converts long notes or study materialintoconcise revision points.

Doubt Solver

•Answers follow-up questions and provides step-by-step guidance

How EduGenie Works

Simple workflow from student input to personalized learning support

Step 1 – Student Input

- Student enters a question, topic, notes or learning goal.

Step 2 – Gemini Processing

- Gemini interprets the request and generates an appropriate response.

Step 3 – Learning Response

- EduGenie provides an explanation, summary, example, quiz or study plan.

Step 4 – Practice & Feedback

- Student answers questions and receives feedback or additional explanation.
